Applications: metal sheets, stainless steel, light alloy, non-ferrous metals. Assembly: by pressure.

Material: steel, stainless steel

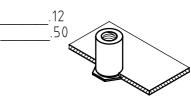

Finishing: standoff in steel: zinc plated (su 80 HRB max)

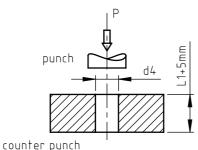

standoff in stainless steel: natural (su 70 HRB max)

Thread d1: metric ISO 6 H

through threaded standoff, M5 thread, Example:

length L1=6mm, zinc plated steel: DP06 0 050.12

thread	counter punch hole diameter d4			
M3 (a)	4,3			
М3 (Ь)	5,5			
M4	7,3			
M5	7,3			

Anchorage pressure may vary depending on material hardness.

The optimum pressure value is empirically achieved. For a correct use of the products observe the specified hole diameters and tolerances.

DP standoff must be inserted flat to the sheet metal surface. Avoid any over-pressure.

It is advisable to carry out some preliminary assembling tests in order to have the best assembly.
